

Publication and display of student's work and photographic images.

It is the School's policy to publicly display student work wherever possible (including newsletters, prospectus, yearbook, website etc.) and to use student images video or still, individual or group, in the same school publications. The Privacy Act requires that we have the permission of students and their parents to do so.

Checking the box below indicates that the parent has explained this requirement to the student and that the parent gives permission for the school to display the student's work and/or image in school publications including those listed above.
